Professional Summary

AI Full-Stack Developer and final-year Computer Engineering student (CGPA 9.1) with 1.5+ years across five internships in full-stack development, LLM integration, data engineering, and robotics AI training data. Builds production-grade apps with Next.js, React, TypeScript, Python, FastAPI, and MongoDB, integrating LLMs (Gemini, DeepSeek, LangGraph) into products used by 1,000+ students. 3rd place of 1,000+ teams at NexBuildOn Hack 2026.

Education

Saraswati College of Engineering, Kharghar (University of Mumbai) **Aug 2023 – May 2027**
Bachelor of Engineering in Computer Engineering *CGPA: 9.1 / 10*

Experience

Autonex AI 360 Pvt. Ltd. **Sep 2026 – Present**
Robotics Annotator Intern *Hybrid*
- Annotate robotics sensor data (images, video, LiDAR) on Encord to train and evaluate robotic perception and control models, including object-handling and simulation workflows.
- Evaluate LLM explanations of time-series sensor data (HVAC, atmospheric CO_2, wearable physiology, EKG) claim by claim for physical correctness and write gold-standard reference explanations.

BrainHeaters **Jun 2026 – Aug 2026**
AI Full Stack Developer Intern *Remote*
- Architected a hybrid recommendation engine (rule-based categorization + DeepSeek LLM) for personalized study suggestions on an EdTech platform (Next.js, TypeScript, MongoDB) **used by 1,000+ students** during peak exam season, with caching and analytics logging.
- Built an interactive DSA learning platform with a flowchart roadmap, XP system, LLM path generator (OpenRouter), a 16-pattern algorithm visualizer, and an AI complexity analyzer.

Exide Industries Ltd., Taloja **Dec 2025 – May 2026**
Software Developer Intern *Navi Mumbai, India*
- Built internal tools for production data and inventory tracking at a large-scale battery manufacturing plant.
- Automated Python and SQL reporting pipelines for production, vendor dispatch, and QC metrics, replacing manual spreadsheet reports and **saving ∼8 hours per week**; built KPI dashboards used by production, QA, and logistics teams.

Labmentix **Jul 2025 – Nov 2025**
Data Analytics Intern *Remote*
- Delivered end-to-end analytics (cleaning, EDA, reporting) across multiple projects on retail datasets of **100K+ records each** using Python (Pandas, NumPy) and SQL.
- Classified and structured product data to client-specific taxonomies using RegEx-based tagging.

GoPerceptive Technologies LLP **Feb 2025 – Jun 2025**
Software Developer Intern *Remote*
- Built Scrapy and Selenium pipelines that ran unattended overnight to collect **50,000+ product records per run** from multiple e-commerce platforms.
- Cleaned, validated, and mapped scraped data to client categories with RegEx, reducing manual processing.

Projects

ShikshaSetu – AI Career Guidance Platform | *Next.js, React, Tailwind CSS, Gemini AI*
- Built a platform that turns AI psychometric assessments into personalized career recommendations; **pilot-tested with 100+ students**.
- Added an AI mock-interview module, a college recommendation engine, and AI-generated career roadmaps.

RogRakshak (Infectra) – Infection Tracing | *Next.js, FastAPI, Neo4j, Supabase, LangGraph, Gemini* **3rd of 1,000+ Teams**
- Built a full-stack system that traces hospital-acquired infection spread with a Neo4j graph database and a LangGraph + Gemini AI layer; placed 3rd at NexBuildOn Hack 2026.
- Implemented Supabase authentication with a closed-signup model and deployed on Vercel and Render.

NeuroPhysio AI – Rehabilitation Platform | *FastAPI, React, TypeScript, TensorFlow, Firebase*
- Built real-time pose detection (TensorFlow MoveNet) over a FastAPI + WebSocket backend for low-latency exercise feedback, with Gemini/Groq recovery insights and Firebase auth.

Technical Skills

Languages: Python, TypeScript, JavaScript, Java, SQL, HTML, CSS
Web & Backend: React, Next.js, Node.js, Express.js, FastAPI, REST APIs, WebSockets, Tailwind CSS
AI / ML: LLM Integration, Prompt Engineering, LangGraph, Gemini, DeepSeek, Groq, OpenRouter, TensorFlow, Scikit-learn
Data: Pandas, NumPy, EDA, Web Scraping (Scrapy, Selenium), RegEx, Encord, LiDAR/Image/Video Annotation, LLM Evaluation
Databases & Cloud: MongoDB, MySQL, Neo4j, Supabase, Firebase, Google Cloud, Vercel, Render
Tools & Practices: Git, GitHub, Postman, Jupyter, Excel, Agile, DSA, OOP, System Design

Achievements & Certifications

- **3rd Place of 1,000+ teams, NexBuildOn Hack 2026** – RogRakshak (Infectra), a hospital infection tracing system.
- **Microsoft Azure AI Fundamentals (AI-900)**; **Google Generative AI**; Full Stack Web Dev (100xDevs); Alpha DSA with Java (Apna College).
